JAN LOUIE MANUEL

FRONT-END WEB DEVELOPER | TECHNICAL SUPPORT

Phone: +63 9463684127 | **Email:** janlouiemanuel24@gmail.com | **Portfolio:** jlm-dev-myportfolio.vercel.app

PROFESSIONAL SUMMARY

I'm an IT professional with hands on experience in technical support, printer troubleshooting and maintenance, alongside a growing focus on front-end web development. I enjoy solving technical problems and building responsive, user-friendly websites that combine functionality with thoughtful design. I aim to leverage my technical background and development skills to create practical digital solutions and contribute to a collaborative team.

Personal Data

Address: Amabelle, Valenzuela City

Birthdate: March 24, 2003

Birth Place: Quezon City

Age: 23 Years Old

ACADEMIC HISTORY

College of Our Lady of Fatima University 2022 - 2026

Bachelor of Science in Information Technology

Our Lady of Fatima University 2020 - 2022

Science, Technology, Engineering, and Mathematics

TECHNICAL SKILLS

- **Web Development:** HTML/CSS, JavaScript, MySQL, Bootstrap, Next.Js, React, Tailwind CSS
- **Multimedia:** Adobe Photoshop, Filmora, Alight Motion
- **Networking & Systems:** Basic Network Troubleshooting, Operating System Installation
- **IT Support & Maintenance:** PC & Epson Printer Troubleshooting, Hardware Installation & Repair

PROFESSIONAL EXPERIENCE

Front-End Web Developer (Freelance)

- Designed and developed responsive front-end websites for classmates' projects using HTML, CSS, and JavaScript.
- Delivered 3+ fully functional sites on time, ensuring clean layouts and cross browser functionality.

Technical Support (OJT)

- Assisted staff with diagnosing and resolving technology issues related to computers, printers, internet connectivity, and software applications.
- Provided general IT assistance to ensure smooth operation of office hardware and systems.

CERTIFICATIONS

Endpoint Security - Offered by Networking Academy through the Cisco Networking Academy program

Endpoint & Host Protection: Learning how to configure host-based firewalls, antimalware defenses, and intrusion prevention systems on both Windows and Linux operating systems.
Threat Assessment & Vulnerability Management: Identifying common network attacks, vulnerabilities across IP protocols, and wireless network security risks.
Cybersecurity Best Practices: Implementing core principles to protect data across network infrastructure, maintaining data confidentiality, integrity, and availability.

Cisco Certified Support Technician (CCST) Cybersecurity
Essential Security Principles: Understanding confidentiality, integrity, availability, authentication, and authorization.
Network Security Concepts: Firewalls, intrusion prevention/detection systems (IPS/IDS), VPNs, and secure network design.
Endpoint & System Security: Securing devices, managing access, and implementing antimalware controls.
Vulnerability Assessment & Risk Management: Identifying threats, evaluating security risks, and using scanning tools.
Incident Handling & Security Operations: Understanding basic incident response workflows, monitoring logs, and analyzing security alerts.

Python Essentials 1 - Offered by Our Lady of Fatima University through the Cisco Networking Academy program
Core Programming Concepts: Understanding primary data types, variables, arithmetic operators, and basic input/output handling.
Control Structures & Logic: Designing execution flow using conditional statements and loops.
Data Aggregation & Functions: Working with data collections and writing modular code using functions.
Scripting for Automation & Security: Applying Python logic to automate practical tasks, which directly complements my cybersecurity and networking background.

Information Technology Specialist Networking – CERTIPORT, CERTNEXUS, PEARSON
Networking Fundamentals: Understanding network infrastructures, local area networks, wide area networks, wireless networks, and network topologies.
Network Hardware & Architecture: Configuring switches, routers, firewalls, media types, and cabling standards.
Protocols & Services: Understanding TCP/IP model layers, IPv4/IPv6 addressing, subnetting, DNS, DHCP, and NAT.
Network Troubleshooting & Tools: Using command line utilities (ping, traceroute, nslookup, ipconfig) to diagnose and repair network performance issues.
Network Security Baselines: Implementing wireless security standards (WPA2/WPA3), ACLs, and basic perimeter protections.

Information Technology Specialist Python – CERTIPORT, CERTNEXUS, PEARSON
Operations using Data Types and Operators: Working with strings, integers, floats, booleans, and performing arithmetic/logical operations.
Flow Control with Decisions and Loops: Implementing conditional logic and repetition.
Input and Output Operations: Reading/writing files and handling standard console input/output.
Code Documentation and Structure: Writing modular code using functions, parameters, return values, and clear inline documentation.

Cyber Threat Management – *CISCO NETWORKING ACADEMY*
Risk & Governance: Designing vulnerability assessment plans and selecting security controls based on industry compliance frameworks.
Incident Response & Recovery: Developing disaster recovery protocols and executing forensic investigation steps for internal and external threats.

Introduction to Modern AI - *CISCO NETWORKING ACADEMY*
Prompt Engineering & LLM Workflows: Utilizing Large Language Models (LLMs) with specialized tools like web scraping, search, and multimodal text/image analysis.
Automation & Problem Solving: Integrating AI chatbots and computer vision applications to optimize daily technical tasks and decision-making.
